

MAP GROWTH NEWS

Bringing you purposeful monthly MAP updates, tips, and resources designed to help students learn, teachers teach, and leaders learn.

The Power of the Growth Mindset

As you embark on this year's MAP assessment, it is important to envision where you would like to see your students at the end of the year. Here are links for more information and creative ideas for helping students set and achieve ambitious academic and personal growth goals:

NWEA System Status and Alert

To avoid glitches during testing it is advisable to subscribe to NWEA's all systems operational multi-product status page for the latest system alerts. By subscribing, you will receive the timely, transparent, and specific information regarding the availability and performance of all NWEA products. Make a habit of checking the system updates **before** testing or running reports to ensure the system is up and running and there are no active incidents or glitches that may affect your testing schedule and plans.
